Research Experience for Undergraduates in

Integration of Biology and Materials

May 26, 2015 – July 31, 2015
Penn State University
Department of Chemical Engineering

Objective: Provide an collaborative, integrated research and professional development program for students in Integration of Biology and Materials as part of a summer experience that will help students develop the skills needed for critical evaluation of biomaterials technologies and a deeper understanding of the research process.

Who should apply: Undergraduate students in Chemical Engineering, Bioengineering, Biology, Chemistry, Materials Science, Physics or related majors currently enrolled at U.S. institutions.

How to apply: Further program information and application instructions are available at:

www.che.psu.edu/reu/

Applications are currently being accepted, and will be considered as received. All applications submitted before March 1 will receive full consideration. Acceptances will be on a rolling basis so apply early.
