VSCADA CAN interface
Sam Cesario

SocketCAN
Linux Kernel that has CAN patches: v2.6.25 Linux Kernel.  

Steps to interface with CAN
Install can-utils (http://elinux.org/Can-utils)
  ● git clone https://github.com/linux-can/can-utils.git
  ● cd can-utils
  ● ./autogen.sh
  ● ./configure
  ● make
  ● make install (with root privileges)

Usage:
SocketCAN has the ability to have virtual can drivers (vcan)
Setting up the Can link
$ modprobe can
$ modprobe vcan
$ sudo ip link add dev vcan0 type vcan
$ sudo ip link set up vcan0
$ ip link show vcan0

Some commands to get started
  candump <interface> <data>
ex: candump vcan 123#11.22.33.44.55.66.77.88
123 = can_id
11.22.33.44.55.66.77.88 = data
