Gerrymandering, Electoral Uncertainty, and Representation

Nicholas Michael Goedert

A DISSERTATION
PRESENTED TO THE FACULTY
OF PRINCETON UNIVERSITY
IN CANDIDACY FOR THE DEGREE
OF DOCTOR OF PHILOSOPHY
RECOMMENDED FOR ACCEPTANCE
BY THE DEPARTMENT OF POLITICS

Adviser: Brandice Canes-Wrone

September 2012
Acknowledgements

I have received very generous advice and support on this project over the past three and a half years. My adviser Brandice Canes-Wrone has helped nurse this idea from a second-year seminar proposal into a fully-realized dissertation, as well as lending indispensible counsel and advocacy in all aspects of my graduate student career. My dissertation committee members Nolan McCarty and Adam Meirowitz provided helpful guidance and feedback throughout the process.

Roy Schotland’s Advanced Election Law seminar at GULC planted an initial seed of inspiration for the project. In its early stages, Adam Meirowitz and Keith Krehbiel gave me access to their original simulation code that served as a foundation for the model in the dissertation. Will Bullock, Steve Rogers, Tali Mendelberg, Jeff Harden, Eric McGhee, and Jason Casellas furnished excellent comments and advice on individual chapters. Rebecca Tunis provided diligent and precise proofreading. The graduate students and faculty who participated in the Princeton American Politics Research Seminar consistently raised insightful questions during the several occasions in which I presented this work. And enormous thanks go to all of my family and friends for their support and patience.

Work from this dissertation was presented at the following conferences:

- Annual Conference of the Midwest Political Science Association, Chicago, IL, 2012.
- Annual Society for Political Methodology Summer Meeting, Princeton, NJ, 2011 (poster)
- State Politics and Policy Conference, Hanover, NH, 2011.
- Annual Conference of the Midwest Political Science Association, Chicago, IL, 2011.
# TABLE OF CONTENTS

Chapter 1. Introduction

Chapter 2. The Gerrymandering Model: A Monte Carlo Simulation

Chapter 3. Partisan Tides and Congressional Competition

Chapter 4. Southern Redistricting under the VRA

Chapter 5. Norms of Representation and Voter Welfare: Simulations

Chapter 6. Norms of Representation and Voter Welfare: Evidence
