Internationales Erwin Schrödinger Institut
für Mathematische Physik

Ninety nine years of General Relativity

Summer school on Global Aspects of Mathematical Relativity

Vienna, July 28 - August 1, 2014

R. Beig:

Introduction to differential geometry

H. Friedrich:

Introduction to general relativity

G. Galloway:

Lorentzian causality

J. Corvino:

Constraint equations

H. Ringström:

The evolution problem in general relativity

G. Holzegel:

Wave equations on black hole space-times

A. Eckart:

The galactic center

Supported by the European Mathematical Society, the International Association of
Mathematical Physics and the Erwin Schrödinger Institute.

Scientific committee: R. Beig (Vienna), P.T. Chrusciel (Vienna), M. Dafermos (Princeton),
H. Friedrich (Golm), G. Galloway (Miami), R. Schoen (Stanford).

Boltzmannngasse 9, 1090 Vienna, Austria - T: +43-1--4277-28301
