

Senior Design Meeting

Minutes - 9/28/22

9/28/22

- Wey - glaring problems with design
 - Folding solar panels, why?
 - Sensors - what are we ordering if we don't know what kind of motors we're gonna use
 - if we fail, we fail
 - what is it supposed to look like
 - we need to know what kind of solar kit we are going to use
- Roger - meeting w/ Khaki, Zigi, Wey
 - Folding solar panel doesn't make sense for this project
 - why build our own frame when many kits already have frames
 - what kind of motors are we going to use.
- Will A - can we get a regular solar panel through a door
- Wey - sub beam for what does this thing actually look like?
 - they could meet with the machine shop
- Will A - we need people looking at that specifically
- Zheping - how powerful do solar panels need to be?
- Khaki - show video with structure that could work for our project
- Roger - folding solar panel would require a stand and a frame vs. just a stand
