

Errata and Future Improvements

Errata

- Populate and test the driver display PCB
- Test system with SCADA
- Add functionality to send CAN messages with the two buttons on the dashboard left panel
- Create wiring for dashboard left panel, proper cables for:
 - Dashboard PCB → epaper display
 - Dashboard PCB → AMS light on right dashboard panel
 - Dashboard PCB → GLV power/CANbus

Future Improvements

- Add more error messages (in addition to overheat, overcurrent, and SLoop open)
- Add a way to know if a new driver has started driving (camera has been suggested)
