

Monday 2/24 Meeting Notes

Results of Interest Response:

- Tabulated in [Interest Survey](#)

Lab 8/25

- Figure out the group that you would like to be a part of and which section to go to
 - Create your own meeting time
 - Figure out system engineer by Friday morning
- Basics of subsystem
 - Where is the car at and what do we have to do
 - Goals

System Engineering

- Management team will not be picking them but if you would like to be one make sure you step up and say something
 - Mechanical system engineer
 - Electrical system engineer
- Meet with Devon to set up airtable and meet at least once a week to check in

Upcoming deliverable (due september 21st)

- Looking at what your subsystem need to do
- Make a schedule of stuff that you need to get done

By Friday

- Draft of goals answering these [Questions](#)
 - Can also put in individual report

Professor Nodovich

- We as a TEAM need a unified (overarching) goals (HAS to be more important than the subsystem and individual goals)
- And how do we measure it

Management team: biggest job is not to be the boss but rather facilitate everyone that is on this team
