

- Email to Rules Committee
 - Ask about AMS & IMD fault lights, whether or not they can be on hood of car and not in Cockpit
 - (Not Dashboard) - Jack Question
- Dashboard Changes
 - Physical Design Changes
 - Swap top panel for a little longer one, this creates a lip over the front of the Dash to cover in case of sunlight
 - Shape considerations
 - Could be Rectangular
 - Laser Cut Plexi
 - Opaque letters cut out
 - Transparent sheet in front of opaque sheet
 - Create Enclosure for phone
 - Electrical Design Changes
 - PCB LEDs positioned where cuts in plexi are, lit up letters will be the labels for each LED
 - Tentative change to Display and Raspberry Pi
 - Easier to Code
 - Power down with car
 - Bluetooth not terrible
 - <https://www.adafruit.com/product/2718>
 - Minecraft (on the car)
 - Cameras if we have time
 - Cockpit relay now in Cockpit button array to reduce wiring between carman
 -
